# The Integrated Agile Enterprise Framework

- Seven Consulting's Agile Project Enterprise Framework outlined below is a proven framework of integrated processes, tools and techniques focused on simpler, faster delivery & improved ongoing support of the delivered change.
- Our key focus is the integration of rapid decision-making, effective planning and delivery of real benefits.

1. **Agile Enterprise (AE)** focuses on the cultural, procedural and people changes required to optimise, adopt, embed and sustain Agile models of project delivery. This includes an agile approach to strategic portfolio governance.
2. **Agile Sponsorship (AS)** requires executives to get closer to their projects, their project managers and their project teams. Sponsors must be flexible in making time available for face-to-face meetings and use simplified and face-to-face reporting lines. The Agile Sponsor is focused on benefits realisation.
3. **Agile Project Management (APM)** is an open, stakeholder-driven approach to project planning. While Scrum Masters and Product Owners focus on the detailed technical delivery, APM's must focus on stakeholder engagement, change management and related projects to ensure outwards as well as inwards management of the project.
4. **Agile Development (ADM)** involves a cultural as well as a procedural and technical change in how projects are planned and delivered. The coaching of project managers and business experts in how to setup and support Agile Development (Scrum, SAFe, etc.) is a critical factor in successful and sustained deployment of Agile Methods.

## Global Investment Banking

*Changing the way projects deliver outcomes to the business*

The Banking and Financial Services Group (BFS) within the Global Investment Banking Company undertook what was to be their largest IT program to replace the Bank's loan and deposit systems with one modern, real-time banking platform using SAP.

Challenged by taking on such an ambitious program of work, the bank decided to significantly reduce the size of the team and move to an Agile delivery method to stabilise home loan origination on the new platform.

Seven led the shift to Agile delivery focusing on the training of team members and stakeholders who had little or no experience of working on Agile projects. Six cross-functional SCRUM teams were formed and under Seven's guidance, were able to deliver the remaining functionality within a 6 month period.

The team was equipped to successfully fall in with the Enterprise Release Train to deliver subsequent changes to the platform.
